Based

The Activu Federal Solutions Group represents thousands of datawall implementations by highly experienced and knowledgeable staff.

With an average of more than 18 years of experience building collaborative datawall solutions, the Activu Federal Solutions Group is likely the most experienced Data Wall Team in the world. All Activu staff are Subject Matter Experts in their roles finding, implementing, and sustaining the right solution for each customer's needs.

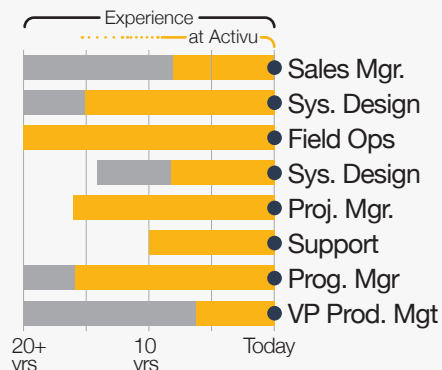

Activu staff regularly work in SCIFs, and have the proper experience and focus to handle the difficult nature of working in this environment. We have a whiteboard-driven discovery process that allows Activu to engineer based on the needs of the situation,

as opposed to responding generically to a specification which may not grasp what is required in implementing a collaborative datawall in a SCIF.

Most SCIFs have a transient staff. We build a custom support plan that will include preventative maintenance, emergency visits, and ongoing professional development. We are committed to the long term success of our implementations and of our customers. In fact, all our systems are flexible in nature and are constantly changing based on the needs brought to our clients in a very unstable worlds.

Activu Federal Team

Senior-level team, proven success on countless projects over many years.

All TS-cleared, many with SCI

360° Process: Consultation, Design, Implement, Maintain

Our team's **extensive experience** helps us anticipate challenges, well before they can impact the project.

Activu has **implemented thousands** of datawall projects.

Activu invented modern video walls, and bring 37 years of insight making them work usefully.

Experts in:

- SCIF implementation
- Design
- Execution
- Government Contracting
- Government Funding
- Process

The Activu Federal Solutions Team brings a mastery of the technologies needed to implement a design approved for government classified networks.

Activu products are on the USAF APL for NIPR, SIPR, and JWICs, as well as the DHS APL for A-LAN, B-LAN, and C-LAN. Additionally, Activu has many other different types of accreditation and can be found used in all branches of DOD and other Civilian agencies. Our team is accustomed to getting approvals, and will assist with all and any approval processes.

Activu is not only a consultative integrator, Activu is a manufacturer. The Activu software we install is very mature, developed by Activu's completely U.S.-based software team in Rockaway, NJ. Through close partnership with customers over the last 4 decades, Activu continually builds new, innovative, and industry-leading capabilities along a forward-looking roadmap.

Activu Federal Solutions

Activu software & control room designs are developed **in-house, in the USA.**

Activu sources **hardware & partners in the USA.**

Custom solutions based on individual project & mission needs.

Fully accredited:

- USAF APL NIPR, SIPR, JWICs
- DHS A-LAN, B-LAN, C-LAN
- Used in all branches of DOD & other Civilian agencies

For over 37 years, Activu has focused on collaborative datawalls, building 50-100 of them annually. Our organization continues to grow, even in times of national and global crisis, consistently delivering outstanding products and experiences, and supporting our customers' evolving needs. The stability and reliability of Activu's business is evident in the performance of our products, services, and consulting teams.

Many Activu systems are implemented as part of a weapons system, and most often in a SCIF environment.

Cyber:

USAF has many locations that use fully redundant equipment on multiple networks that have the ability to share visual data to multiple spaces including datawalls, remote desktops, conference rooms, and other facilities.

DHS has multiple locations that monitor everything from Social Media to Air Traffic Control and World events. They not only work on localized events and also focus on protecting government networks.

ISR:

USAF ISR teams are able to manage intelligence and video information based on who is needed to see the information.

Border Security:

CBP uses Activu for full situational awareness including localized missions, cyber threats, and media driven issues.
