

Event-Driven Visual Intelligence Anywhere.

Deploy fast.

Vis|ability Cloud, from Activu, is the first cloud collaboration platform designed specifically for critical decision environments, including:

- **ITSM** IT Service Management
- **SIEM** Security Information & Event Management
- **APM** Application Performance Management
- **ITOM** IT Operations Management

Integrate apps like:

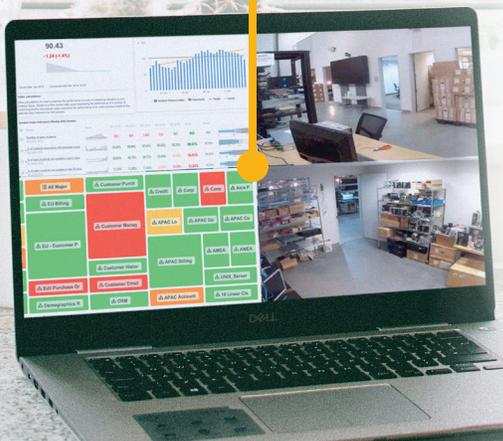

servicenow riverbed
splunk > IBMQRadar
New Relic. bmc
dynatrace

...and more, for unequalled, proactive Event-Driven Visual Intelligence.

Speed up time-to-resolution

Vis|ability ensures entire team access and collaboration around the critical information that gets the job done, seamlessly with anyone on the network. Enjoy fast and intuitive access to information-in-context, and easily manage and inform an entire organization—in a control room environment or distributed across an entire continent.

Indispensable to organizations and workers who are frustrated by the explosion of tools and information without the ability to easily weed out the noise, vis|ability connects to business, process, and security information systems to automate the presentation and distribution of critical incident information—exactly when needed—directed to decision-makers and teams.

The Virtual Command Center, only from Activu

Secure

- Create virtual networks
- Firewall web applications
- Manage HW security modules

Scalable

- Flexible, scales to need
- High-demand emergency usage available.
- Add sources, users, & locations without extra equipment.

Lower Cost

- Less hardware to deploy
- Cloud-based backend provisioning & setup
- Fast implementation from order to uptime.
